Summary

Highly motivated and results-oriented software developer with over 15 years of experience designing, developing, and implementing innovative software solutions. Proven ability to lead and collaborate effectively within cross-functional teams to deliver impactful projects on time and within budget. Possesses strong technical skills in .NET Framework, SharePoint, Power Platform, and various programming languages.

Technical Skills

.NET Framework	SharePoint	Power Platform	SQL Server
HTML	CSS	Software Integration	Extract, Transform, Load (ETL)
Data Visualization	Data Analysis	Customer Support	Project Management
Microsoft Dynamics AX	NetSuite	Reporting	Tracking and Monitoring

Soft Skills

Problem-solving	Time Management	Adaptability	Decision Making
Critical Thinking	Excellent communication skills	Accountability	Work ethic
Leadership	Teamwork	Process improvement	Organization

Work Experience

SISCO | Applications and System Developer   Feb 2024 – Aug 2024

- Designed and implemented a comprehensive company intranet, enhancing internal communication and collaboration across departments, resulting in improved employee engagement and information accessibility.
- Successfully integrated NetSuite with the intranet, enabling seamless data flow and access to critical business information, which improved operational efficiency and user experience.
- Developed a user-friendly application using Microsoft Power Platform for HR employee appraisals, enabling HR and managers to provide structured feedback on employee performance, which streamlined the appraisal process and improved transparency.
- Created a robust workflow application for the finance department to automate payment request processing, incorporating multiple approval stages to ensure compliance and reduce processing time.
- Collaborated closely with HR and finance teams to gather requirements and ensure that the applications met their specific needs, leading to increased satisfaction and adoption rates among users.
- Actively participated in iterative development cycles, utilizing user feedback to enhance application functionality and user experience.

Worley | Application Developer   Sep 2017 - Dec 2022

- Collaborated with cross-functional teams to develop new features and improve existing functionality.
- Interacted with users for technical requests to understand business requirements in different project lifecycle phases.
- Collaborated with the IT department to integrate various systems and streamline data flow across different departments, resulting in improved operational efficiency.
- Collaborated with cross-functional development team members to analyze potential system solutions based on evolving users' requirements.
- Successfully integrated disparate systems to ensure seamless data flow and efficient communication between departments.
- Assisted the human resources team in developing HR management systems, optimizing employee data management and streamlining HR processes.

Worley | EDMS Administrator   **Sep 2014 - Sep 2017**

- Administered the in-house Document Management System (DMS), handling users, groups, security, attributes, table updates in the EDMS, along with customer service support to the users of the DMS.
- Supported IT teams to troubleshoot issues and expedite solutions.
- Collaborated with team and clients in identifying and applying best practices and continuous improvement.

Worley | Software Developer   **Dec 2007 | Sep 2014**

- Built, tested and deployed scalable, highly available and modular software products.
- Implemented a project cost module.
- Conducted thorough testing and debugging of software applications to ensure optimal performance and user satisfaction.
- Successfully integrated disparate systems to ensure seamless data flow and efficient communication between departments.
- Implemented Personnel Assignment and Authorization Form system to track hiring employees to Iraq project with workflow from data entry user to manager for approving/rejecting hires.
- Collaborated with stakeholders from different departments to gather requirements, design solutions, and deliver high-quality software products.
